Daily coffee enemas

Vegetarian diet

I.V. [Non Corn-Derived BeTaC Vitamin-C](#) 50 to 75 gm daily in D5W with calcium gluconate + magnesium sulfate + potassium chloride

and

1 to 2 vials of [Ultra Absorbic-C](#) (Oral: 10 gm/ vial) in divided dosages.

The oral Ultra Absorbic-C dosages can be used as a replacement for I.V.'s after the initial I.V program which may vary from 2-weeks to 6-months depending on the patient's condition and progress. Use divided dosages of 1/2 vial (5 gm) per administration, 1 to 4 divided dosages per day, with meals and 1 dosage before bed.
